#### **ABOUT OSE IMMUNOTHERAPEUTICS**

OSE Immunotherapeutics is a biotechnology company specializing in immune regulation with clinical applications in immuno-oncology, autoimmune diseases and transplantation. The company has a balanced portfolio, from R&D to clinical phase 3 registration, with a diversified risk profile. It is composed of advanced immunotherapy products in clinical pivotal phase 3 and in phase 2 with Tedopi® (combined neoepitopes in oncology, developed in advanced lung cancer, NSCLC); and FR104 with phase 1 completed (a CD28-antagonist Immunotherapy licensed to Janssen Biotech Inc.). The company also has promising products in preclinical phase and potential drug candidates in R&D, targeting new receptors of interest in immuno-oncology, autoimmune diseases, and transplantation. This product portfolio is supported by an innovative technology foundation and know-how in

selection and optimization of new generation products acting on new immunological targets, notably Effi-DEM, a new generation check-point inhibitor targeting the SIRP- $\alpha$  receptor on strategic CD47/SIRP- $\alpha$  pathway (blockage of suppressive myeloid and macrophage cells) and Effi-7, an immunomodulator, interleukin-7 antagonist, developed for autoimmune diseases and transplantation.
