

Job Title: MSL immune-oncology France, United Kingdom, Belgium

Location: Home-based (France)

Job Type: CDI Full-Time

Company Overview: OSE Immunotherapeutics is a listed (Euronext market) French clinical-stage leading biotechnology company dedicated to the development of innovative first-in-class immunotherapies for immune-oncology and inflammatory diseases (6 clinical assets, over 60 employees). Our mission is to improve the lives of patients by advancing cutting-edge science and delivering transformative treatments. We are specialized in the development of innovative immunotherapies for the activation and/or regulation of the immune system across different areas of expertise: epitope-based T-cell vaccines, monoclonal antibodies (agonist, antagonist, bispecifics) and mRNA Therapeutics for the treatment of cancers, autoimmune diseases and chronic inflammation diseases.

You will join an international and dynamic MSLs team, navigating in a rapidly growing field of immunotherapies.

Job Description:

The MSL is a remote role focused on developing and maintaining peer-to-peer relationships with OSE's sponsored studies investigators and key medical experts. This role will primarily support the company immune-oncology development program, especially in lung cancer. The MSL will collaborate with physicians and other medical experts to support trial enrolment, provide program and protocol training and ensure that health care professionals have the most up to date information of the clinical development programs.

Key Responsibilities:

- Develop and maintain peer-to-peer collaborations and relationships with key medical experts in the oncology community, with a particular focus in lung cancer
- Support OSE's clinical development studies including site identification, trial recruitment (in collaboration with representatives of the CRO), and presentation of final approved data
- Collaborate with physicians on medical affairs initiatives including publications, experts meetings, medical education opportunities, training, and speaker development
- Serve as scientific peer-to-peer resource to external disease experts and internal stakeholders and support the medical community with up-to-date medical information, robust disease expertise, and product information
- Communicate clinical insights on new data to the company Medical Affairs and to inform medical strategy for the therapeutic area
- Train internal stakeholders on key scientific and medical topics in relevant therapeutic area
- Develop an understanding of the regional landscape including specialties involved in care of patients
- Generate tactical regional plans to provide needs based, value-added support of the medical and scientific community in line with local/national guidance
- Maintain accurate reporting and documentation of MSL activities

Qualifications:

- Medical Doctor (MD), Pharmacist (PharmD) or PhD
- Previous experience in Medical Affairs or Medical Science role is a plus
- Prior oncology experience preferred

Skills, knowledge, abilities :

- Good oral and written communication skills
- Sense of initiative, and functions well as part of a cross-functional team
- Time management and organisation skills, ability to travel (50% time)
- Demonstrated ability to work independently
- Excellent verbal and written communication skills
- Experience in a start-up environment preferred
- Must be pro-active team player and flexible

How to Apply:

Interested candidates should submit their resume and cover letter to Valerie Gabarre, head of MSL team at the following address : valerie.gabarre@ose-immuno.com

Our Commitment: OSE Immunotherapeutics is committed to respecting equality in the treatment of candidates during its recruitment procedures, regardless of age, gender or gender expression, ethnic origin, skin color, nationality, disability, marital status, sexual orientation, pregnancy and maternity, religion or belief, and any other category protected by law.
